

BEARING GUARD™ ISOLATORS

"TOTAL PROTECTION FOR YOUR BEARINGS WITH EASE OF INSTALLATION, AND DIRECT PERMANENT REPLACEMENT FOR LIP SEALS, AND NO MODIFICATION TO YOUR EQUIPMENT"

Centrifugal Pumps
Electric Motors
Spindles
Pillow Blocks
Horizontal Rotating Equipment

- **Easy to Install:** Sealed Cartridge design allows simple & quick one step installation.
- **Shaft Protection:** Non-Contacting design protects against shaft or sleeve wear
- **Internal Pumping Ring:** Traps contaminants at groove inside body and repels them back to atmosphere.
- **Single Elastomer Design:** No complicated series of internal O-rings to cause problems
- **Materials of Construction:**
660 Bearing Bronze is standard metallurgy.
Aflas is standard O-ring elastomer.
Other materials available on request.
- **Cross Sections:** Bearing Guard is available in cross sections as small as .250 inch.
- Available in inch or metric size
